

## ***Detoxify or Die!***

In today's, toxic environment we are exposed to air pollution, processed foods, and toxic chemicals all around us as well as metal residues are built up in the body faster then ever before on a daily basis. Resulting in a larger occurrence of allergies, and physical and mental toxicity breakdown.

Today we are exposed to the greatest toxic load ever seen in history. Regular detoxification is essential to maintain a healthy body and avoid diseases. The Beauty Health™ Ion Detox Spa, Combined with a healthy, low-stress lifestyle, provides a thorough, safe and efficient way to maintain high energy levels and long term wellness.

### **How Many Treatments Do I need ?**

Normally, it takes 6-8 weeks of detox treatments, which consists of a 30 min treatment every other day with monthly follow-ups are recommended to purge the body of a lifetime of toxins. A Regular scheduled regiment of treatments will help to keep the toxin levels down and body pH levels in balance.

### **Your Body's pH Balance is Critical for Good Health!**

PH is the acronym for "Potential Hydrogen – the standard scientific measure for levels of acidity in organic material. For Example, gardeners and farmers often need to know the pH of soil. Aquarium and pool owners continually check the pH of water. In Health and Medicine, the pH of our bodily fluids is a key indicator of our general state of health.

### **Alkaline Body = Healthy Body**

The pH range is from 0 to 14 – with pH of 7.0 being neutral. Any measurement of 7.0 or above is Alkaline. Anything below 7.0 is Acidic. A healthy body needs to have a pH balance above 7.0. (Consult our website for ways to check your bodies pH levels)

As with most living organisms, the human body does not function correctly without balanced pH. Research has found that disease and illness have difficulty thriving/surviving in an alkaline environment – yet they thrive in an acidic environment.

Acidic pH balance decreases your body's ability to absorb vitamins, minerals, food supplements and other nutrients and decreases cellular energy production as well as hindering the natural process for repairing damaged cells. It also decreases your ability to detoxify heavy metals and fatty acids causing them to build up in your body and can lead to formation of tumor cells and makes you more susceptible to fatigue and illness.

### **Detoxify Your Body ~ Feel Better**

Your body can become acidic from an acid-rich diet, from toxic overload, and from emotional stress.

The Beauty Health™ Ion Detox Foot Spa is designed to help balance your body's pH level. Some studies have shown that after just one 30 minute treatment, a persons pH balance can be restored from acidic levels to a healthy alkaline level thus making the Ion Detox Foot Spa a very effective method of not only detoxifying but also for balancing the body's pH.

## How Does The Ion Detox Foot Spa Work?...

Simply place your feet in the Beauty Health™ Ion Detox Foot Spa with warm salt water, the specially designed spa stimulates the 2000+ sweat glands located in each foot, providing a channel for toxins to be pulled from the body and deposited into the

The array, which is placed in the water of the spa creates an electromagnetic field in the spa and allows for a process called “osmosis” to occur.

Since our bodies are made up of over 70% water, by aligning the ions in our bodies we in effect produce a flow much like a magnet in our bodies that pulls the toxins that have settled in the bodies organs and fat cells and puts them into the blood stream to be removed from the body thru the pores of your feet and from urination and other natural body functions

The array once placed in the water creates a high concentration of charged ions, allowing the body to re-activate and re-charge the positively charged (unbalanced) cells in the body. Individuals will feel lighter and experience a greater sense of well being from each Ion Detox Foot Spa treatment.
